

# Recycling in your Community

What are the 3 R's of recycling?

What do the 3 R's mean?

\_\_\_\_\_ : Using less one-time use items that will end up in the landfill.

\_\_\_\_\_ : Using products made of glass, hard plastic, or fabric that can be used more than once.

\_\_\_\_\_ : The process of taking glass, plastic, paper, and cardboard and turning them into something new!

## Single Use Items

A single use item is something you use once and throw away after. For example, plastic bags and pop cans. Can you name a couple single use items?

---

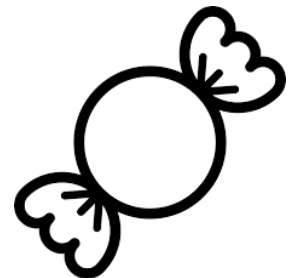

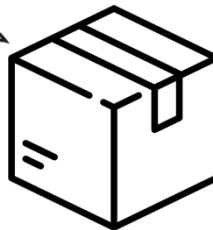

---

---

**Garbage**

**Recycling**

**Compost**

Color in the items and draw a line to which can they go in!
